## About This Content

Kholat Aftermath is a comic book continuation of a video game based on the motives of real events known as Dyatlov Pass Incident and created by IMG.N.PRO in 2015.

Kholat: Aftermath presents four seemingly unrelated stories:

- a secret interrogation referring to a hidden note from the game
- a letter from Vitaliy Grazeniuk (main character of the game) to his fiancée
- an appeal for help from a person being a prisoner of a something called "section 22"
- and the beginning of an investigation conducted by two Moscow militiamen

How the fates of the heroes will go?

Could all the events be a product of the sick imagination of Grazeniuk? Is he murderer or a victim?

Or maybe someone is trying to hide the facts that experiments in section 22 got out of control?

And who is the mysterious Anton?

The game is exactly what it promises to be - a mix between a Shoot 'Em Up and an Action RPG.

This game is for you if you like SHMUPS and Diablo-like loot systems.

This game probably isn't for you if you dislike grinding and/or fighting a lot of the same enemy types.

The soundtrack is top notch, the art style is appealing.

The movement might take a little time getting used to - some might say it's a bit sluggish or slow. I think it works fine - it's a matter of taste really. Your weapons lack a little punch (visually), but that doesn't change my recommendation.

Play the demo if you're unsure. I personally like it a lot - 15-20 minutes is totally worth it.. nice puzzle game but fixed key mapping, hard for those who only WASD like me.... Garbage. Finished it just to say I did.. Brilliant! Superior in almost every way to MotoGP™13. And the ways that it's not as good are so minor they aren't worth mentioning. I should know, I've played MotoGP™13 for 121 hours so far.;). This skin is very fun to use!!!. Play domino in VR was a quite creative idea, I've tried several domino games, this one's real gravity and BGM makes me stay longer.

If this game could add a destroy mode would be better. I enjoy the moment when you destroy everything including toys after a long-time build up .

I found a couple bugs were I glitch out of the game, and also you can beat this game by just doing one level over and over again. but overall this is a fantastic play and I had tons of fun going through it. I can't wait for the future updates. Here is the link to my playthrough of it if anyone is interested <https://www.youtube.com/watch?v=Qu-fBPj0FCs>. This is one of the only VR games that I regret buying. There are many more challenging and enjoyable shooting games to invest your time in instead. A few of the levels are enjoyable and fairly well done, but nothing unique. It would be nice to have a shotgun for the clay style rounds, instead of just a single pistol for everything.

There is no menu apart from a grid of levels, and all of those levels are available to play right from the start. The result is that I had no sense of progression through (or particular incentive to play) the game at all. There is an arcade mode where you can play each game once and then get a total score at the end, but I lost interest after doing it once.. still holds up. I got the Viper and the Aston Martin but not the Abarth. What a great game, definitely enjoyed the concept and the scenery. Can't wait for chapter 2. Don't worry about what the haaterssss say..Great game. A lot of potential.. I'd like to preface this review by stating that I LOVE the Nancy Drew games. I've been playing them for over ten years now. I'm not a fan of Nancy herself by any means (you'd think they could have found a better voice actress but ok) but I love having to scope out weird locations, make sure to get the right info out of the right people at the right time, collect evidence, and of course solve puzzles. I haven't played them all but I think I've completed about 15 of them so far.

Kapu Cave, specifically, is a huge letdown. All the characters are dull. The little minigames are just time-wasters (Fishing and necklace-making? Really? Couldn't have at least made another puzzle to do?) The story and ending are predictable, there is virtually nothing of the local lore involved unless you pay with the in-game currency, I beat it in 5 hours, and the four puzzles in the game are tedious and one of them is even completely random and not a puzzle to figure out at all. Disappointing.
